

5.4 Work Programme

Please outline in the following table how the programme of the IP will be implemented on a day-by-day basis. In addition to the days of subject-related work, you are asked to indicate also arrival- and departure days, as well as days foreseen for cultural activities and weekend days where no subject-related activities will take place. Please note that these days are not taken into consideration when counting the **minimum requirement of 10 days of subject-related work**. However, they count for the calculation of the subsistence rates.

The work programme should indicate the length of the activities and show that the planning is realistic. The length of subject-related activities per day should ensure that there are activities of about 6-8 hours a day.

Add rows as necessary
